

Summit Wire & Cable Services

Efficient, Effective, Easy

Wire services that simplify the job

Summit's expanded wire and cable inventory features color-coded feeders, 4/1 combo reels, and pre-installed pulling heads – everything you need for a trouble-free project.

Make wire & cable projects easy with:

- 1. Color-coded feeders** – Our color-coded feeders help you quickly identify the right wire for the right job while keeping your wiring consistent and safe.
- 2. 4/1 combo reels** – Set up 4/1 combo reels more quickly than traditional stands. A 4/1 combo reel can also reduce pulling time, circuit time, and material costs.
- 3. Pulling heads assembly** – Summit-installed pulling heads save time and increase jobsite safety. No need for knives or crimpers during wire pulls.
- 4. Paralleling** – Streamline work when you parallel up to four feeds, plus ground, onto one 4/1 combo reel.
- 5. Scrap Management** – Our scrap solutions include buying off master reels, cut-to-length services, and return programs. Ask about other custom solutions.

Summit Wire & Cable Services saves money through:

-  **Decreased labor costs**
-  **Increased efficiency**
-  **Reduced scrap inventory**
-  **24/7 emergency service**
