

**NOW IN STOCK!**

# Simplify Automation, Maximize Performance

Your Trusted Source for Drive Solutions.

ABB offers world-class drives and drive systems to help you improve energy efficiency, asset reliability, productivity, safety, and performance.

**Industries:**

- Chemical
- Food/Beverage
- HVACR
- Marine/Offshore
- Mining
- Oil/Gas
- Manufacturing
- Water/Wastewater
- And More!

**Applications:**

- Compressors/Blowers
- Cooling Towers
- Cranes/Hoists
- Explosion Proof
- Material Handling
- Solar Pumps
- Stacker Cranes
- Winches
- And More!

## Experience the Summit Advantage!

- ABB Authorized Dealer
- Stocking Range: 0.5hp to 75hp
- Onsite Startup Assistance
- Registered ABB Drives Receive a 6-month Extended Warranty
- Tech Support/Hands-On Training
- Retrofit & Modernize Legacy Drives of Different Manufacturers
- Local Inventory
- Competitive Pricing

## ACS255 Micro Drives

0.37kW - 15kW | 0.5hp - 20hp

The ACS255 micro drive delivers excellent performance and quality at a competitive price, featuring all essential machinery application functionalities where the drives are exposed to dust, moisture, and chemicals.

### Use Cases:

- Basic Applications
- Food & Beverage
  - augers, mixers, conveyors, pumps, fans

## ACS355 Machinery Drives

0.37kW - 22kW | 0.5hp - 30hp

The ACS355 is a compact, cost effective, versatile drive offering the best connectivity in its class. Built for system integrators, OEM, or panel builders.

### Use Cases:

- Material Handling
- Food & Beverage
- Rubber/Plastic/Wood Processing

## ACS580 General Purpose Drives

0.75kW - 522kW | 1hp - 700hp

The ACS580 general purpose drives simplify drive selection, setup, operation, and maintenance, making them suitable for a wide range of applications across various industries. Multiple configurations are available.

### Use Cases:

- Light Industry Applications
- Variable & Constant Torque Applications
  - compressors, conveyors, mixers, pumps, fans

## ACS880 Industrial Drives

0.56kW - 6000kW | 0.75hp - 8050hp

The ACS880 delivers top-tier performance with ABB's Direct Torque Control (DTC) for precise speed and torque control across all applications and motor types. It offers a comprehensive range, including wall-mounted drives, drive modules, cabinet-built drives, low harmonic, and regenerative variants. Built-in essential features streamline engineering, installation, and commissioning, saving time.

### Use Cases:

- Industrial Material Handling
- Harsh Environments
- Heavy Use Machinery

**We also supply motors, line reactors, DV/DT filters, PLC's, and HMI's for your next project.**
